PACKAGING:

Bulk product in sealed containers, with inert headspace, complying with European and American standards for food products.

HANDLING AND STORAGE:

Store cold at 2-8°C, dry and protected from direct sunlight. Due to high viscosity and possible stratification during storage, product should be agitated before use or sampling. Viscosity may be reduced by heating (up to 35°C) and /or gently stirring if necessary. Containers opened for sampling should be headspace flushed with inert gas prior to storage. Product can be stored at ambient temperature during transportation.

RETEST DATE:

2 years when stored in unopened and sealed containers at recommended storage conditions

COMMENTS:

May contain traces of crustacean proteins. Material is of animal origin - Antarctic Krill (Euphausia Superba).
